MONTGOMERY  technologies

# AMENITY WIFI

Did you know that WiFi installed incorrectly exposes the building to liability, including compliance with CALEA, DMCA “Safe Harbor,” and maintenance of banned/blocked lists?

WiFi is the most frequently requested amenity in commercial real estate, with installations occurring in almost every common area of a building:

- Lobby
- Conference Room
- Outdoor Seating
- Fitness Center
- Cafeteria

## ENTERPRISE-LEVEL SECURITY

From its in-house Network Operations Center (NOC), Montgomery monitors the Amenity WiFi network and all connected devices and services 24x7x365. Amenity WiFi is actively monitored to ensure DMCA “Safe Harbor” and CALEA compliance, and banned/blocked lists are maintained for all sites. All firmware and software updates are included, ensuring your WiFi network provides up-to-date protection against the latest, sophisticated security threats.

## CUSTOMIZED DESIGN

We conduct a comprehensive review of your desired coverage area. Then we design the optimal WiFi infrastructure that ensures maximum coverage and performance.

## PROFESSIONAL INSTALLATION

Our certified network engineers and experienced field technicians ensure a successful implementation, on time and on budget.

## THE RIGHT APPROACH TO WIFI

Installation of Amenity WiFi by Montgomery Technologies leverages commercial-grade technology, complete with security solutions developed specifically for the commercial real estate industry. Leveraging an enterprise-class design, Amenity WiFi reduces liability and ensures maximum performance and uptime. Updates, monitoring, and maintenance is always included to ensure comprehensive cybersecurity and maximum uptime.

## A PROVEN PLATFORM

Montgomery’s Amenity WiFi is installed in hundreds of premier office buildings nationwide. Our experienced team has a long, proven track record of installing, maintaining, and monitoring Amenity WiFi networks in commercial high-rise buildings. Upon an outage of a WiFi device or service, our NOC engineers immediately follow established protocols, contacting the building management and monitoring the progress until the issue is resolved.

## PROACTIVE MONITORING

Our NOC monitors, manages, and maintains your WiFi 24x7x365, ensuring maximum uptime and compliance with all applicable laws and regulations.
